PROFILE

I am a full-stack Software Engineer with a passion for solving unique problems. My previous career has given me a robust skill set that is translatable anywhere, including diagnostics, organization, and team management. I am excited to be able to combine all the expertise I've gained along the way and contribute meaningfully to a great company.

SKILLS

Front-End

HTML/CSS, Javascript, React

Back-End

MongoDB, Express, Node

Tools

Git, GitHub, VS Code, Jira

PROFESSIONAL EXPERIENCE

Software Engineer

#100 Devs

01/2022 – present

Remote

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Heating Technician

Surrey School District

Surrey, Canada

- Worked with a team of technicians to keep heating and cooling systems online in a district of 130+ schools
- Diagnosed and corrected issues in a large variety of equipment, learning constantly
- Provided preventative maintenance and organized documentation for pumps, boilers, furnaces, air handling units, and much more

Area Manager

Franworks Franchise Company

04/2010 – 09/2015

Calgary, Canada

- Worked with General Managers to improve user experience, and reduce overhead where feasible
- Responsible for ensuring locations adhered to company culture and policies
- Provided training and assistance for store-level employees

ORGANISATIONS

Shelter Movers

Mover

05/2019 – present

Vancouver, Canada

Shelter Movers is a volunteer-driven organization that assists women out of domestic violence situations. My role was to create as stress-free a moving experience for them as possible.
